- Full account import/export capabilities
- Integrated ACH electronic funds transfers
- Integrated Credit Card Processing

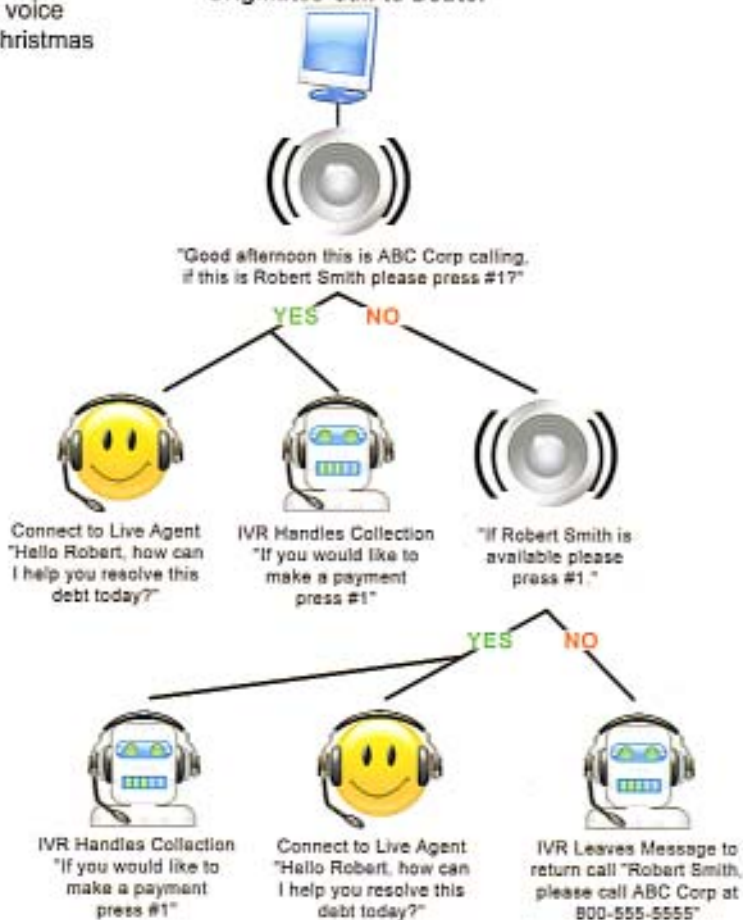

It wasn't built by elves at the North Pole, but CallThru with Debtmaster is the perfect gift this Holiday season. Designed using the latest in Voice Exchange and VoIP technology, CallThru and Debtmaster can more than double your right-party connections.

- * Much like Santa, CallThru knows what your collectors have been doing and can easily display collector statistics in real time.
- * Make your list and check it twice, then let Voice Broadcasting reach all of them for just pennies a day.
- * Running low on elves to answer calls? Let CallThru's IVR handle those calls that don't need agent intervention, or incoming calls all day, long after everyone has settled in for their winter naps.
- * Faster than sliding down the chimney, CallThru instantly pops with the debtor information when the caller is connected to the collector.
- * Rudolph's red nose is like a blinking voice mail light, only now voice mails can be viewed from anywhere, not just on those foggy Christmas Eve's, included in an email with a voice attachment.
